DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Lannen et al.* (5,497,412) in view of Method for Calculating the Check Digit (ISO/TC 46/SC 9/WG 1, date 08/06/1999, by Jane Thacker).

As per claims 1-3, Lannen et al. disclosed a mobile station comprising a memory device for storing an IMEI code having at least six digit hexadecimal Serial Number (SNR) representation, wherein said SNR is used with a procedure so as to insure backwards compatibility with an existing installed base of mobile stations having a Binary Coded Decimal (BCD) SNR representation (see col. 18/ln. 47-53 and conversion Table below). Lannen et al. do not disclose a hexadecimal check digit calculation procedure. However, such hexadecimal check digit calculation procedure is well known in the art, as taught in the Method for Calculating the Check Digit (pg. 1-pg. 4). Therefore, it would have been obvious to one of ordinary skill in the art to provide such hexadecimal check digit calculation procedure to the converting procedure of Lannen et al. in order to verify the validity of the mobile stations.

Allowable Subject Matter

3. Claims 4-5 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Parment et al. (4,325,117) and Hughes et al. (4,535,204) disclose check digit method.
